

NAVEEN RAJ

Systems Engineer | Cloud & Application Support | Production & Platform Operations Support

+91 9600542042 • naveence@outlook.com • [LinkedIn/naveen_raj](#) • Bengaluru, India

PROFESSIONAL SUMMARY

Systems Engineer with 7.1 years of hands-on experience in application support, cloud support, and production/platform operations across multi cloud environments (GCP, AWS). Skilled at structured troubleshooting and root cause analysis to resolve complex platform operations and production issues quickly, managing incidents end to end, and keeping enterprise SaaS platforms running reliably for global customers. Strong track record of maintaining 95 percent plus SLA compliance, cutting P1 incidents by 25 percent, and reducing deployment errors by 70 percent. Clear communicator experienced in change management, stakeholder coordination, and day to day.

Systems Engineer – Cloud & Application Support | Iron Mountain Services – Bengaluru Jul 2022 – Present

- Handled end-to-end L3 application and cloud support for enterprise SaaS platforms on GCP and AWS, including Nuxeo CSP, INSIGHT DXP, ECM, and GenAI DXP, resolving common issues directly and escalating complex problems as per procedure to keep production stable and available for global customers around the clock.
- Took ownership of incident response, diagnosing issues, troubleshooting, and root cause analysis, applying structured problem-solving techniques that brought down P1 recurrence by 25% and helped the team consistently hold 95%+ SLA compliance across all production environments.
- Looked after cloud infrastructure spanning GKE, EKS, EC2, S3, and GCP Storage, maintaining software product configurations, install base records, and third-party integrations while driving structured change management aligned with Planning Increments to keep upgrades smooth and downtime-free.
- Worked closely with the DevOps team, applying Agile and DevOps methodologies such as sprint planning and iterative delivery to align release schedules, infrastructure changes, and support workflows across the organization.
- Reported and documented bugs and defects to the Engineering and QA teams for further analysis, providing reproduction steps and supporting logs to help prioritize fixes based on customer impact.
- Played a hands-on role in Nuxeo CSP and DXP, ECM customer onboarding by building container images, managing patch cycles, and automating CSP workflows alongside PS developers and engineering teams, assisting clients and dealer partners with implementing new products and upgrades and training them on day-to-day product use and utilization.
- Brought deployment errors down by 70% by building reliable CI/CD pipelines using GitLab CI/CD and Jenkins, applying software release management practices, rolling out Blue-Green and Canary release strategies, and weaving compliance checks into every workflow.
- Working with API endpoints using Postman and Swagger product configuration changes, confirming expected responses and catching integration issues.
- Monitored platform health and tracked day-to-day incidents, SLA breaches, and deployment issues using pre-defined Grafana and Datadog dashboards set up by the SRE team, applying performance measurement and tuning to catch bugs and defects early. Kept a close watch on logs through CloudWatch, GCP Cloud Logging, ELK, and Splunk, and stayed active in 24x7 on-call rotations.
- Kept stakeholders across Customer Success, engineering, and management well-informed by translating complex incident updates and risk assessments into clear, actionable communication, following customer support policies, standards, and procedures throughout.
- Used available large language model endpoints and prompt engineering to speed up day-to-day development and troubleshooting work, building and testing GenAI-powered features and automating routine coding tasks with AI-assisted tools.

Associate III – Cloud Infrastructure Services | UST Global – Trivandrum Jan 2022 – Jul 2022

- Handled L2/L3 cloud and application support for enterprise customers, troubleshooting application, system, and network issues across 100+ incidents every month while staying in line with SLA targets and ITIL practices. Recurring outages dropped by 30% through consistent RCA and follow-through.
- Managed Zscaler ZIA/ZPA configurations including DNS and SSL proxy policies, and played an active part in platform migration efforts, keeping downtime minimal and end-users well-informed throughout.

Associate II – Cloud Infrastructure Services | UST Global – Bengaluru

Aug 2020 – Dec 2021

- Monitored production environments and handled L1/L2 incidents daily, keeping uptime above 98% through proactive troubleshooting and quick triage. Supported over 200 enterprise users globally and made sure SLA commitments were consistently met.
- Worked closely with cross-functional teams to track down and fix recurring operational issues, which cut repeat incidents by 20% and noticeably improved overall platform stability.

Consultant – IT Support Engineer | Vibrant Screen Pvt Ltd – Bengaluru

Sep 2019 – Aug 2020

- Provided IT support across hardware, software, and enterprise systems for a global user base, taking care of employee onboarding and offboarding, access provisioning, IT asset and risk management, server patching, and backup operations.

TECHNICAL SKILLS

Application & Production Support: Nuxeo INSIGHT DXP, Nuxeo ECM, GenAI Nuxeo CSP, Conductor Services, product configuration and setup knowledge, incident handling and troubleshooting, root cause analysis, problem-solving, service level agreements, change management, platform operations, customer onboarding, monitoring and alerting, Postman, Swagger, API endpoint testing.

Support Tools: ServiceNow, OpsGenie, xMatters, JIRA, customer support policies and procedures

Cloud Platforms: GCP (GKE, Compute Engine, Cloud Monitoring, Cloud Logging, Cloud Armor, Cloud Storage), AWS (EC2, ELB, EKS, S3, CloudWatch, WAF).

Containers, DevOps & Monitoring: Kubernetes, Docker, Helm, Jenkins, GitLab CI/CD, Terraform, staged and gradual release rollouts, release planning, product reliability tracking, performance monitoring and tuning, Grafana, ELK Stack, Splunk, AWS CloudWatch, GCP Cloud Logging, dashboard creation, alerting, error tracking.

Security, Databases & Scripting: Zscaler ZIA/ZPA, IAM, DNS, HTTPS, Load Balancing, Firewalls, PostgreSQL, MongoDB, Linux Administration, Python (foundational), Bash, clear communication, stakeholder coordination, cross-functional collaboration, ITIL practices.

SKILL DESCRIPTORS

- Communicates technical issues clearly to clients, teams, and managers, adapting the message for each audience.
- Solves problems by identifying root causes, weighing fixes, and following support policies and escalation procedures.
- Maintains strong product technical knowledge, tracking customer environments and reported issues.
- Supports release planning and rollout with minimal disruption, and tracks fixes to improve product reliability.
- Monitors system performance and troubleshoots software, application, and cloud infrastructure issues within Agile and DevOps workflows.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering | Anna University • 2015 – 2018

Diploma in Computer Engineering | TN-DOTE • 2012 – 2015

GCP CLOUD SKILL BADGES
